Index

Symbols

(cosine) similarity search 121

A

AI
language translation, with 103 - 106
AI agents
building, with Embabel 257 - 260
building, with Koog 257 - 260
building, with LangChain4j 257 - 260
building, with Spring AI 238 - 250
AI code 266
generating 266
need for 268, 269
performance 270
roles 269
writing 267, 268
AI model 166 - 169
performance 183
switching 11 - 15
AI provider 89, 93
types 91, 92
APIs, in Spring AI
Advisors API 29, 30
ChatClient API 26 - 28
ChatModel API 24 - 26
Advisors API 29, 30
custom-crafted advisors 32 - 35
Spring AI provided advisors 30 - 32
ApplicationRunner interface 9
Artificial General Intelligence 20
Artificial Intelligence (AI)
overview 18 - 22
Aspect-Oriented Programming (AOP) 23
Audio Model API 49, 50
agentic AI
chained-sequential workflow 232
Evaluator-Optimizer workflow 234
orchestrator workflow 233

overview 231, 232, 235 – 237
parallelization workflow 232
routing workflow 233
application programming interfaces (APIs) 23, 24
asynchronous calls
versus synchronous calls 54 – 57
audio
embedding, with Spring AI 132 – 137
processing, with Java Sound API 127 – 132
audio transcription (speech-to-text) 106 – 111

C

ChatClient
enabling, with composable ChatModel 211 – 214
ChatClient API 26 – 28
auto-configuration 28, 29
ChatModel API 24 – 26
ChatOptions
using 176 – 179
CommandLineRunner interface 9
Connect 4 application
implementing 151 – 159
Cosine Similarity 38
call count
observing 199 – 201
code generation 100 – 103
composable ChatModel
ChatClient, enabling 211 – 214
custom text splitters 216 – 219
DocumentTextSplitter 219, 220
NewlineTextSplitter 221
ParagraphTextSplitter 221
SentenceTextSplitter 222
StructuredOutputConverters 222

D

Data Transfer Objects (DTOs) 244
DecoratedSimpleVectorStore 214, 215
Deep Fakes (DF) 21
Deep Learning (DL) 18, 19
Deeplearning4j
reference link 257
Dependency Injection (DI) 23
Digital Signal Processing (DSP) 137
DocumentTextSplitter 219, 220
Domain-Specific Language (DSL) 242
discrete measurements
usage 203

disruption

history 265

progression change 265, 266

documents

handling 80 – 83

E

Embabel 273

AI agents, building 257 – 260

Embeddings model API 37 – 40

SimpleVectorStore and similarity search 40 – 45

evaluation testing

usage 202

F

Foundational Models (FM) 21

ffprobe program

reference link 129

function calling 84

StockQuotesFunction application 85 – 88

G

Generative AI 21

I

Image Model API 45 – 49

Inversion of Control (IoC) 23

J

JTokkit

reference link 223

Java Server Pages (JSP) 100

Java Sound API

audio, processing with 127 – 132

K

Koog

AI agents, building 257 – 260

L

LLaVa

reference link 13

LangChain4j

AI agents, building 257 – 260

Langchain4j 273

Large Language Models (LLM) 21

language translation

with AI 103 – 106

latency

observing 195 – 199

M

MCP Client

Spring AI agents, invoking 250 – 256

Machine Learning (ML) 18
Metadata 183, 184
TokenCountEstimator 188 - 190
Metadata API
using 184 - 188
Model Context Protocol (MCP) 230
reference link 238
ModelOptions
using 176 - 179
Mozilla's Developer Network (MDN) 103
moderation model API 35 - 37

N

NewlineTextSplitter 221

O

Ollama
reference link 13
OpenAI model
reference link 11
OpenAI's Tokenizer tool 223 - 225
reference link 223

P

ParagraphTextSplitter 221
Prompt 58 - 63
Prompt engineering 67 - 76
Prompt templates 63 - 66
pre-generate answers
using 204 - 211

R

Reactive Programming
reference link 55
Real-Time Message Translation (RTMT) 99
application requirements 100
for messaging 99, 100
Retrieval Augmented Generation (RAG) 30

S

SentenceTextSplitter 222
SerpApi
reference link 239
Service Provider Interface (SPI) 24
Shazam 120 - 122
history 122 - 124
implementing 124 - 126
reference link 117
running 143 - 146
SimpleVectorStore 40 - 45
Spring AI

additional features 159 - 161
AI agents, building 238 - 250
audio, embedding with 132 - 137
game board data structure 161 - 166
prompts 159, 160
reference link 4
used, for identifying song 138 - 142
Spring AI API 89, 90, 93
types 90, 91
Spring AI BeanOutputConverter 78, 79
Spring AI agents
invoking, with MCP Client 250 - 256
Spring AI provided advisors 30 - 32
Spring AOP 23
Spring Framework
reference link 244
StockQuotesFunction application 85 - 88
StructuredOutputConverters 222
spring-ai-extensions module 223
start.spring.io 4 - 11
reference link 5
structured output 76 - 78
Spring AI BeanOutputConverter 78, 79
synchronous calls
versus asynchronous calls 54 - 57

T

TarsosDSP (jDSP) 138
TensorFlow
reference link 257
TokenCountEstimator 188 - 190
Top K 180
example 180 - 182
Top P 180
example 180 - 182
Tritonus Java library
reference link 128
technology convergence 270 - 272
text-to-speech 112 - 114
token count
observing 191 - 194
tokenization 187
