Part 3

Beyond Simple Intelligence

This section explores advanced Spring AI capabilities and the future of intelligent systems. Readers learn how to create production-ready AI applications with observability, testing, monitoring, and custom extensions. It also introduces Agentic AI, tool calling, memory, retrieval, and MCP integration for building AI agents, before concluding with a broader discussion on the impact of AI on software engineering, society, ethics, and responsible innovation.

This part of the book includes the following chapters:

- *Chapter 7*, *Become a Spring AI Power User*
- *Chapter 8*, *Secret Agents*
- *Chapter 9*, *Demystifying the Impact of AI*

‹ Chapter 6: Connecting the Dots

Chapter 7: Become a Spring AI Power User ›
