Table of Contents

1. About This eBook
2. Preface
    1. To the Reader
    2. A Tour of This Book
    3. Conventions
    4. Sample Code
3. Acknowledgments
4. 1. An Introduction to Java
    1. 1.1. Java as a Programming Platform
    2. 1.2. The Java “White Paper” Buzzwords
    3. 1.3. Java Applets and the Internet
    4. 1.4. A Short History of Java
    5. 1.5. Common Misconceptions about Java
5. 2. The Java Programming Environment
    1. 2.1. Installing the Java Development Kit
    2. 2.2. Using the Command-Line Tools
    3. 2.3. Using an Integrated Development Environment
    4. 2.4. JShell
6. 3. Fundamental Programming Structures in Java
    1. 3.1. A Simple Java Program
    2. 3.2. Comments
    3. 3.3. Data Types
    4. 3.4. Variables and Constants
    5. 3.5. Operators
    6. 3.6. Strings
    7. 3.7. Input and Output
    8. 3.8. Control Flow
    9. 3.9. Big Numbers
    10. 3.10. Arrays
7. 4. Objects and Classes
    1. 4.1. Introduction to Object-Oriented Programming
    2. 4.2. Using Predefined Classes
    3. 4.3. Defining Your Own Classes

4. 4.4. Static Fields and Methods
5. 4.5. Method Parameters
6. 4.6. Object Construction
7. 4.7. Records
8. 4.8. Packages
9. 4.9. JAR Files
10. 4.10. Documentation Comments
11. 4.11. Class Design Hints

8. 5. Inheritance
    1. 5.1. Classes, Superclasses, and Subclasses
    2. 5.2. `Object` : The Cosmic Superclass
    3. 5.3. Generic Array Lists
    4. 5.4. Object Wrappers and Autoboxing
    5. 5.5. Methods with a Variable Number of Arguments
    6. 5.6. Abstract Classes
    7. 5.7. Enumeration Classes
    8. 5.8. Sealed Classes
    9. 5.9. Pattern Matching
    10. 5.10. Reflection
    11. 5.11. Design Hints for Inheritance
9. 6. Interfaces, Lambda Expressions, and Inner Classes
    1. 6.1. Interfaces
    2. 6.2. Lambda Expressions
    3. 6.3. Inner Classes
    4. 6.4. Service Loaders
    5. 6.5. Proxies
10. 7. Exceptions, Assertions, and Logging
    1. 7.1. Dealing with Errors
    2. 7.2. Catching Exceptions
    3. 7.3. Tips for Using Exceptions
    4. 7.4. Using Assertions
    5. 7.5. Logging
    6. 7.6. Debugging Tips
11. 8. Generic Programming
    1. 8.1. Why Generic Programming?
    2. 8.2. Defining a Simple Generic Class
    3. 8.3. Generic Methods
    4. 8.4. Bounds for Type Variables

5. 8.5. Generic Code and the Virtual Machine
6. 8.6. Inheritance Rules for Generic Types
7. 8.7. Wildcard Types
8. 8.8. Restrictions and Limitations
9. 8.9. Reflection and Generics

12. 9. Collections
    1. 9.1. The Java Collections Framework
    2. 9.2. Interfaces in the Collections Framework
    3. 9.3. Concrete Collections
    4. 9.4. Maps
    5. 9.5. Copies and Views
    6. 9.6. Algorithms
    7. 9.7. Legacy Collections
13. 10. Concurrency
    1. 10.1. Running Threads
    2. 10.2. Thread States
    3. 10.3. Thread Properties
    4. 10.4. Coordinating Tasks
    5. 10.5. Synchronization
    6. 10.6. Thread-Safe Collections
    7. 10.7. Asynchronous Computations
    8. 10.8. Processes
14. 11. Annotations
    1. 11.1. Using Annotations
    2. 11.2. Defining Annotations
    3. 11.3. Annotations in the Java API
    4. 11.4. Processing Annotations at Runtime
    5. 11.5. Source-Level Annotation Processing
    6. 11.6. Bytecode Engineering
15. 12. The Java Platform Module System
    1. 12.1. The Module Concept
    2. 12.2. Naming Modules
    3. 12.3. The Modular “Hello, World!” Program
    4. 12.4. Requiring Modules
    5. 12.5. Exporting Packages
    6. 12.6. Modular JARs
    7. 12.7. Modules and Reflective Access
    8. 12.8. Automatic Modules

9. 12.9. The Unnamed Module
10. 12.10. Command-Line Flags for Migration
11. 12.11. Transitive and Static Requirements
12. 12.12. Qualified Exporting and Opening
13. 12.13. Service Loading
14. 12.14. Tools for Working with Modules
16. Appendix
17. Index

Previous chapter
‹ Core Java, Volume I: Fundamentals, 13th Edition
