About the Author

Satej Kumar Sahu is a principal engineer at Zalando SE with 15 years of hands-on experience designing large-scale, data-intensive systems for global brands including Boeing, Adidas, and Honeywell. He is passionate about technology, people, and nature. A specialist in software architecture, big-data pipelines, and applied machine learning, he has shepherded multiple projects from whiteboard sketches to production deployments serving millions of users.

Satej has been working with large language models since their earliest open-source releases, piloting retrieval-augmented generation and agentic patterns long before they became industry buzzwords. He is the author of two previous programming books—*Building Secure PHP Applications* and *PHP 8 Basics*—and is a frequent speaker at developer conferences and meet-ups around the world.

When he isn't translating cutting-edge AI research into practical code, you'll find him mentoring engineering teams, contributing to open-source projects, or tinkering with

the newest transformer models in his home lab. He believes that through technology and conscientious decision-making, each of us has the power to make this world a better place.
