Acknowledgments

I would like to thank my parents for always believing in and having patience with me while I pursued my interest in technology and for giving me the freedom to explore and try different things. Also, thanks to my sister Lipsa for always being beside me whenever I needed her. I would like to thank all my teachers for being with me during my journey, Runish for the foundational mentoring support at the start of my career, Mindfire Solutions for my first career opportunity, and all with whom I have had an opportunity to interact and learn from. Last but not least, I would like to thank Melissa for the awesome opportunity to write my second book and the wonderful team at Apress for all their support without whom this book would not have been possible.
