ImageIO, Discussion
ImageModel, Solution-Discussion
images
  - classification of, Introduction
  - generating, Problem-Discussion
  - inferences from, Problem-Discussion
immutable data, Discussion, Introduction
implicitly declared class, Solution-See Also
import statement, Discussion
incremental compiling features, IDE, Discussion
indent() method, Discussion
indent(int n) method, Discussion
indenting strings, Discussion
indexOf() method, Substrings, Discussion
Inet6Address, Discussion

InetAddress object, Discussion-Discussion, Discussion
InetAddress.getByName() method, Discussion
inferences from images, Problem-Discussion
inferencing, in machine learning, Introduction
info() method, Discussion
initializer function, Discussion
initialValue() method, Discussion
Inline::Java (Perl module for Java), Introduction
inner classes, Problem-Discussion, Problem-Discussion, Problem-Discussion
input/output (I/O), Introduction-Discussion
- attribute changes to files, Problem-Discussion
- binary data, Problem-See Also, Discussion
- console/controlling terminal, reading from, Problem-The Console (Controlling Terminal)
- converting character sets, Problem
- copying files, Problem-Discussion
- creating and deleting files or directories, Problem-Directories
- directory roots, Problem-Discussion
- duplicating streams, Problem-Discussion
- end-of-line characters, Problem
- File Watcher Service, Problem
- JAR archives, Problem-See Also
- methods for file and directory information, Problem-Legacy compatibility File—Files
- name changes to files, Problem-Discussion
- network text data transfer, Problem-Discussion
- neutral reading of files, Problem-Discussion
- Path object, Problem-Discussion
- platform-independent, Problem-Discussion
- reading text files, Problem-Formatted Printing
- reassigning standard streams, Problem
- scanning files, Problem-Discussion
- standard input, reading from, Problem-Standard input and output streams
- streams, Solution-Discussion
- terminal, reading from, Problem-The Console (Controlling Terminal)
- text, reading, Problem-See Also
- transient/temporary files, Problem-Discussion
- walking a file tree, Problem-Discussion
- Zip archives, Problem-See Also
InputStream class, Introduction

- and ClassLoader, Discussion
- closing to prevent memory leaks, Discussion
- creating URL, Discussion
- reading binary data, Solution-Discussion
- reassigning standard streams, Solution
- with sockets, Discussion, Solution-Discussion

InputStreamReader class, Solution, Standard input and output streams, Solution
insert() method, Discussion
instance main, Solution-See Also
instance() method, Discussion
Instant class, Discussion
Integer class, Solution, Discussion
Integer.parseInt() method, Solution, Standard input and output streams
Integer.TYPE, Discussion
integers, Introduction
- checking in strings for, Discussion
- converting to/from bit-series numbers, Problem-Discussion
- multiplication by fraction, Problem-Discussion
- rounding, floating-point numbers, Rounding
- very large numbers, Problem-Discussion
- working on range of, Problem

Integrated Development Environment (IDE), Introduction-Introduction
- batch refactoring for, Problem-Discussion
- compiling, running and testing with, Caveat lector, Solution-See Also
- Maven support for, Discussion

integrator function, Discussion
IntelliJ IDEA, Discussion-See Also
- inner classes as lambdas, displaying, Discussion
- JUnit with, Discussion
- Preview, enabling, Discussion
- TeamCity, Discussion

@interface annotation, Solution, Discussion
interfaces, Discussion
- (see also functional interfaces)
- callbacks via, Problem-Discussion
- with default, static, and private methods, Discussion, Problem-Static and private methods in interfaces, Introduction
- finding server-side network, Solution
- predefined lambda, Problem-Discussion
- sealed, Discussion

internal iteration, Iterable.forEach method 8
internationalization, Discussion
– choosing particular locale, Problem-Discussion
– controlling case, Discussion
– dates and times, Localized DateTimeFormatter instances
– formatting strings for, Discussion
– with I18N resources, Solution-Setting the locale, Problem
interned box values, Discussion
Internet Protocol (IP), Discussion
interpolation, string, String templates 21P
introspection, JUnit's use of, Discussion
IntStream class, Solution
IntStream.rangeClosed() method, IntStream.rangeClosed().forEach() 8
IntUnaryOperator class, Roll Your Own Functional Interface
invoke() method, Discussion, Discussion
invokeExact() method, Discussion
IOException, Introduction, Discussion, Standard input and output streams, Discussion
IP (Internet Protocol), Discussion
IPv6, Discussion
isCancelled() method, Discussion
isDone() method, Discussion
isEmpty() method, Discussion
isNan() method, Discussion
isNestMateOf() method, Discussion
isPresent() method, Discussion
isProbablyPrime() method, Discussion
iterable data, publishing your structure as, Problem-Iterable.forEach() 8
Iterable interface, Solution-Iterable.forEach() 8, Default methods
Iterable.forEach() method, Iterable.forEach method 8, Iterable.forEach method 8
iterating over structured data, Three-part for loop
Iterator interface, Tokenizing, Discussion, Discussion-Discussion
iterator() method, Solution, Discussion

Project Panama, Discussion
proleptic Gregorian calendar, Discussion
Properties class, Getting information from system properties-Getting information from system properties, Properties-Properties
Properties file, Discussion
properties files, locale, What happens at runtime?, Discussion
protected defineClass() method, Discussion
ProtectionDomain, See Also

prototyping code with JShell, Discussion
pseudorandom number generator (PRNG), Introduction, Problem-See Also
Publisher interface, Discussion
pure functions, Introduction
push() method, stack, Discussion
push-down stack, Discussion
put() method, Discussion
Python, Introduction, Introduction, Discussion-Discussion

Q

Quarkus, High level frameworks
Quartz, Solution
Queue, Introduction
Queue interface, Discussion, Problem-Discussion

R

R Foundation for Statistical Computing, Discussion
R language, Introduction, Problem-Discussion
  - calling Java code within R session, Problem-Discussion
  - choosing an implementation, Problem
  - FastR, Discussion
  - GUI frontend for, Discussion
  - interactive use of, Problem-Discussion
  - Renjin to access, Problem-Discussion
  - web page display of data, Problem-Discussion
random numbers, Introduction, Problem-See Also
random() method, Discussion
range() method, Discussion
rangeClosed() method, Solution
Rats! (parser generator), Discussion
React Native, See Also
Reactive API, Solution
read() function, in Apache Spark, Solution
read() method
  - and end-of-line character issue, Discussion
  - IOException, Standard input and output streams
  - Reader, Discussion
read-evaluate-print loop (REPL) interface, Solution-Discussion, Discussion

Reader class, Introduction
  – character conversion, Standard input and output streams
  – closing to prevent memory leaks, Discussion
  – reading text data, Solution-Discussion
readers-writer lock, Solution-See Also
reading files (see input/output)
readInt() method, Discussion
readLine() method
  – and end-of-line characters, Discussion
  – for platform-independent code, Solution
  – standard input, reading from, Standard input and output streams
  – strings, Introduction, Discussion
readLock() method, Discussion
readUnsignedByte() method, Discussion
readUnsignedShort() method, Discussion
ReadWriteLock interface, Discussion-Discussion
real numbers, Introduction
record data type, Solution-Java record type 16, Discussion, Discussion, Introduction
recurring event calculation, Problem-Discussion
recursive descent parser, Discussion
RecursiveAction class, Discussion
RecursiveTask class, Discussion
REDemo, Discussion-Discussion
redirection, Discussion
ReentrantReadWriteLock class, Solution
refactoring, IDE feature, Caveat lector, Discussion, Discussion, Problem-Discussion
reflection, Introduction-See Also
  – annotations, Discussion, Problem-See Also
  – Class descriptor, Problem-Discussion
  – class file construction or modification, Problem-Discussion
  – ClassLoader class, Problem-What next?
  – CrossRef program, Program: CrossRef
  – dynamic loading/instantiating of classes, Problem-Discussion
  – fields, accessing, Problem-Discussion
  – JavaCompiler, Problem-Discussion
  – listing classes in a package, Problem-Discussion
  – methods, accessing, Dealing with code that depends on the Java version or the operating system, Problem-Discussion
  – nested members of a class, Problem-Discussion

- opens command to export to, Discussion
- printing class information, Problem-Discussion
- private fields/methods, accessing, Problem-Discussion
- timing program, Problem-See Also
- and Unsafe object, Probably?

regular expressions (regex), Introduction-Program: Full Grep
- controlling case in, Problem-Discussion
- finding matching text, Problem-Discussion
- grouping to specify part of, Problem
- JGrep program, Program: Full Grep
- matching accented or composite characters, Problem
- matching String to regex, Solution-Discussion
- newline matching in text, Problem-Discussion
- printing all occurrences of pattern, Problem-Discussion
- regex package, Discussion-Discussion
- regex public API, Discussion-Discussion
- replacing matched text, Problem-Discussion
- splitting strings, Tokenizing
- syntax of, Problem-Discussion
- very large numbers, Discussion

reliability issue for AI, Other
remote interface, Discussion
Remote Methods Invocation (RMI), See Also
remove() method, java.util.Iterator, Discussion, Discussion
Renjin, Discussion, Introduction
REPL (read-evaluate-print loop) interface, Solution-Discussion, Discussion
replace() method, Discussion
replaceAll() method, Discussion, Discussion
replaceFirst() method, Discussion, Discussion
replacing matched text, Problem-Discussion
request() method, Discussion
ResourceBundle class, Discussion
ResourceBundle.getBundle() method, What happens at runtime?, Solution
REST API, Discussion
REST-based web services, Introduction
RESTEasy, REST frameworks
RESTful Java with JAX-RS 2.0, 2nd Edition (Burke), See Also
RESTful server with JAX-RS, Problem-See Also
retainAll() method, Set, Discussion
@Retention annotation, Discussion

reverse() method, Discussion, Discussion
reversed() method, Discussion
reversing strings, Problem-Discussion
Richards, Mark, REST frameworks, See Also
Ritchie, Dennis, Discussion
rJava library, Solution-Discussion
RMI (Remote Methods Invocation), See Also
Robson, Elisabeth, Introduction
Roman numeral formatting, Roman numeral formatting
RomanNumberFormat class, Roman numeral formatting
round() method, Rounding, Rounding
rounding error, Introduction
rounding, floating-point numbers, Rounding
Ruby, Introduction
run() (method of Runnable interface), Discussion, Discussion
  – scheduling tasks, Discussion, Discussion-Discussion
  – threading, Discussion, Discussion, Discussion
running an application, IDE tools, Solution-See Also
Runtime class, Solution
Runtime.exec() method, Introduction
RuntimeException class, Problem-Discussion
RxDart, See Also
RxJava, See Also

S

S language, Discussion
saveFile() method, Discussion
Scala, Introduction, Introduction, Introduction
Scalable Vector Extensions (SVE), Discussion
scan() method (Gatherer), Discussion
scanf() function, C, Discussion
Scanner class, Introduction, Discussion-Discussion, Standard input and output streams
scanning files, Problem-Discussion
scheduling tasks with threading, Problem-See Also
SCM (source code management) system, Caveat lector
scope values, Maven dependency management, Maven
ScopedValue class, Discussion-See Also
ScriptEngine interface, Discussion

ScriptEnginesList program, Discussion
Scripting Engine framework, Discussion, Discussion
scripting languages, Introduction
SDKMAN, Introduction
sealed types, Problem-Discussion, Discussion
search() method
  – Collection, Discussion
  – Predicate, Discussion
security
  – avoiding user-provided format strings, Discussion
  – Jenkins CI server, Discussion
  – network-based loggers, Discussion
SecurityManager (deprecated), See Also
select() method, Discussion
Semaphore class, Discussion
separation of concerns, and DOP, Discussion
separator property, Dealing with code that depends on the Java version or the operating system
separatorChar property, Dealing with code that depends on the Java version or the operating system
sequential versus threaded processing, Introduction
serialized Java object data, network transfer of, Solution, Discussion
server-side network, Introduction-See Also
  – client contact with socket server, Problem-See Also
  – finding network interfaces, Solution
  – HTTP protocol, Problem-Discussion
  – Java Util Logging, Discussion, Solution-Discussion
  – layering of, Introduction
  – multiple-client handling with threading, Problem-Discussion
  – RESTful server with JAX-RS, Problem-See Also
  – returning a response (string or binary), Problem-Discussion
  – securing web server with TLS, Problem-See Also
  – securing with TLS, Problem-See Also
  – SLF4J, Discussion, Solution-Discussion
  – Unix domain sockets, Solution-See Also
  – writing socket-based server, Problem-Discussion
ServerSocket class, Solution-Discussion, Solution, Discussion
service end of network connection, Discussion
service feature, JPMS, Discussion
servlet, Introduction

Servlet API, Discussion
Set data structure, Discussion
Set interface to avoid duplicate Values, Problem
set methods, number formatting, Discussion
Set<PosixFilesPermission>, Legacy compatibility File—Files
setAccessible() method, Discussion
setClock() method, Discussion
setLastModified() method, Discussion
setLastModifiedTime() method, Solution
setMinimumIntegerDigits() method, Discussion
setOut() method, Solution
setPort() method, Discussion
setReadable() boolean method, Discussion
shape (Vector), Discussion
Shape class, Discussion
shared arena, Discussion
sharing data among threads, Problem-See Also
shoulder surfing, defending against, The Console (Controlling Terminal)
shutdown() method (ScopedValue), Discussion
shutDown() method (Thread), Discussion, Discussion
Simple Logging Facade for Java (SLF4J), Discussion, Solution-Discussion
SimpleFileServer, Solution
Single Instruction Multiple Data (SIMD), Discussion
Singleton pattern enforcement for JVM, Solution-See Also
size() method, Discussion
slash (/)
  - filename separator, Dealing with code that depends on the Java version or the operating system-Dealing with code that depends on the Java version or the operating system
  - JSON Pointers, Discussion
SLF4J (Simple Logging Facade For Java), Discussion, Solution-Discussion
snippets, Javadoc code, Snippets 18-Snippets 18
SOAP-based web services, Introduction
sock.receive() method, Discussion
sock.send() method, Discussion
sockaddr_in structure, Discussion
Socket class, Solution, Discussion, Discussion
socket code, Introduction
Socket object, Discussion
socket server, contacting, Problem-See Also

SocketException class, Discussion
SocketFactory, Discussion
sockets (see client-side network; server-side network)
Software Tools (Kernighan and Plauger), Discussion
sort() method, Discussion-Discussion
SortedSet interface, Discussion
sorting collections, Problem-Discussion
source code management (SCM) system, Caveat lector
source-code launcher, Discussion
spaces to tabs conversion, strings, Problem-Discussion
Spark, Introduction, Problem-See Also
species of vectorization, Discussion
split() method, Tokenizing, Discussion
Spliterator, Introduction
Spring AI, Introduction, Spring AI, See Also
Spring Boot, High level frameworks
Spring DI, Discussion-See Also
Spring Framework, Discussion
square brackets ([ ]), Markdown, Markdown 23
SSE (Streaming SIMD Extensions), Discussion
SSL certificate management, Discussion-See Also
SSLServerSocketFactory class, Discussion
Stack class, Discussion, Discussion-Discussion
standard input, reading from, Problem-Standard input and output streams
Standard JDK, compiling and running with, Problem-Discussion
start() method
  – Matcher, Discussion
  – ProcessBuilder, Solution
  – Thread, Discussion
startClass() method, Program: CrossRef
startsWith() method, Discussion
startWalkingAt() method, Discussion
static accessor method, Discussion
static import feature, Solution
static methods, improving interfaces, Static and private methods in interfaces
static String.format() routine, Discussion
stderr stream, Discussion
stdout stream, Discussion
Stevens, Richard, See Also
stop() method, Discussion

Stream class, Introduction, Solution-Discussion
Stream Gatherer, Problem-See Also
Stream interface, Introduction
stream() method, Discussion
stream-based TCP connection, Discussion
Stream.flatMap() method, Discussion
Stream.forEach() method, Stream.forEach method 8, Iterable.forEach method 8
Stream.sorted() method, Discussion
Stream<Path> list() method, Discussion
Stream<String> lines() method, Discussion
Streaming SIMD Extensions (SSE), Discussion
streams, Discussion
  - bytes to be read or written, Introduction
  - Collector terminal function, Problem-Discussion
  - duplicating, Problem-Discussion
  - in functional programming, Solution-Discussion
  - input/output, Solution-Discussion
  - parallel, Problem-Discussion
  - reassigning standard, Problem
  - simplifying processing, Solution-Discussion, Problem-See Also
Streams API, Discussion
StreamTokenizer class, Discussion
String class, Introduction
  - controlling case, Problem-Discussion
  - getting methods list, Discussion
  - immutability of, Introduction
  - Java support for, Introduction
  - methods for alternative number base conversions, Discussion
  - pattern matching, Discussion
  - sorting collections, Discussion
string literals, internal storage of, Introduction
String objects, and StringBuilder, Discussion
String.boolean matches() method, Discussion
String.class, Discussion
String.format() method, Introduction, Discussion, Discussion
string.formatted() instance, Discussion
String.join() method, Discussion
String.repeat() method, Discussion
String.split() method, Tokenizing, Discussion
String.substring() methods, Discussion

String.trim() method, Tokenizing
StringAlign class, Discussion-Discussion
StringBuffer class, Discussion, Discussion
StringBuilder class, Solution-Discussion
  – aligning strings, Solution
  – converting Unicode characters to strings, Discussion
  – multiline text strings, Introduction
  – pattern matching, Discussion
  – reversing characters in a string, Discussion
  – string concatenation, Introduction
StringBuilder.append() method, Timing results
StringBuilder.length() method, Discussion
strings, Introduction-Program: A Simple Text Formatter
  – aligning, Problem-Discussion
  – concatenating, Introduction, Solution-Discussion, Introduction, Discussion, toString()-toString()
  – controlling case, Problem-Discussion
  – creating messages with I18N resources, Problem-Setting the locale
  – formatting, Problem-String templates 21P
  – immutability of, Introduction-Introduction, Discussion
  – indenting and unindenting, Discussion
  – interpolation of, String templates 21P
  – java.time object conversion, Problem-Discussion
  – localization (see internationalization)
  – nonprintable characters, adding to string, Problem-Discussion
  – number conversion, Introduction
  – processing one character at a time, Problem-Discussion
  – regular expressions (see regular expressions)
  – reversing, Problem-Discussion
  – spaces to tabs conversion, Problem-Discussion
  – storing in properties and preferences, Problem-Properties
  – StringBuilder, Solution-Discussion
  – substrings, Solution
  – text formatter sample, Program: A Simple Text Formatter
  – tokenizing, Solution-Tokenizing
  – Unicode character conversion, Problem-Discussion
  – validating numbers in, Problem-See Also
StringTemplate class, String templates 21P
StringTokenizer class
  – breaking strings apart, Solution

– joining strings, Discussion
– scanning files, Discussion-Discussion
– splitting string into words, Tokenizing
stringtree.org JSON parser, Introduction
strip() method, Tokenizing
stripIndent() method, Tokenizing, Discussion
stripLeading() method, Tokenizing
stripTrailing() method, Tokenizing
StructuredTaskScope object, Discussion
structuring data (see data structures)
subclasses, Discussion
– and abstract methods, Problem-Discussion
– creating custom exceptions, Problem-Discussion
– with CrossRef, Program: CrossRef
– in object-oriented programming, Use subclassing and delegation
– with sealed types, Problem-Discussion
– and stream classes, Discussion
subMap() method, Discussion
SubmissionPublisher class, Discussion
submit() method, Discussion
Subscriber interface, Discussion
subSet() method, Discussion
substring() method, Substrings
– aligning, Solution
– breaking strings apart, Solution
– finding regex matching strings, Discussion
– MethodHandle API, Discussion
substrings, Solution
Subversion, Caveat lector
Suleyman, Mustafa, Other
super() method, Discussion
superclass constructor, Problem-Discussion
supplier() function, Discussion
Swing, Dealing with code that depends on the Java version or the operating system
synchronization
– methods with StringBuffer, Discussion
– threads, Discussion-Discussion
synchronized keyword, Solution-Discussion
synchronizers, Introduction

synchronous sockets, Introduction
System class, Solution, Standard input and output streams, Solution
system-dependent code, Getting information from system properties
– (see also operating systems)
System.console() method, Solution, The Console (Controlling Terminal)
System.currentTimeMillis() method, Discussion, Solution
System.getenv() method, Getting environment variables
System.getProperties() method, Getting information from system properties-Getting information from system properties
System.getProperty() method, Getting information from system properties-Getting information from system properties, Discussion
System.in, Solution
System.loadLibrary() method, Discussion
System.out, copying program output to, Solution
System.out.print() method, Timing results
System.out.println() method, Discussion, Introduction, toString()
System.Properties, Getting information from system properties-Dealing with code that depends on the Java version or the operating system
System.setErr() method, Solution
System.setProperty method, Discussion

T

Tabs class, Solution-Discussion
tabs to spaces conversion, strings, Problem-Discussion
tailMap() method, Discussion
tailSet() method, Discussion
Tait, Andrew, Other
@Target annotation, Discussion, Discussion
TCP/IP connection, Problem
TeamCity, Discussion
tee command, Discussion
TeePrintStream, Discussion-Discussion
TempConverter program, Program: TempConverter-Program: TempConverter
TemporalAccessors, Discussion
TemporalAdjusters factory class, Discussion
temporary/transient files, Problem-Discussion
TensorFlow, TensorFlow
terminal operation, Discussion
terminal, reading from, Problem-The Console (Controlling Terminal)

ternary operator, Discussion
@Test annotation with JUnit, Discussion
test command (Maven), Discussion
Test-Driven Development (TDD), Discussion
testing
  – code for version or OS at runtime, Dealing with code that depends on the Java version or the operating system
  – continuous integration, Problem-Discussion
  – with IDE, Solution-See Also
  – unit testing for errors in code, Discussion, Problem-See Also
TestNG, See Also
text
  – line by line reading of files, Problem-Formatted Printing
  – network transfer of, Problem-Discussion
  – reading or writing, Problem-See Also
text blocks, Introduction, Discussion, Discussion
text formatter sample, Program: A Simple Text Formatter
TFTP (Trivial File Transfer Protocol), Introduction
Thompson, Ken, Discussion
Thread class, Discussion, Discussion, Discussion
thread pool, Introduction, Discussion-Discussion, Discussion, Discussion, Discussion
Thread.start() method, Discussion
Thread.stop() method, Discussion
threaded I/O, See Also
threading, Introduction-See Also
  – implementing, Problem-Discussion
  – locks, Problem-See Also
  – parallel processing with Fork/Join, Solution-Discussion
  – Queue interface, Problem-Discussion
  – scheduling tasks, Problem-See Also
  – sharing data among threads, Problem-See Also
  – synchronizing, Discussion-Discussion
  – timeouts, Problem-Discussion
  – virtual threads, Solution-Discussion
ThreadLocal class, Solution-Discussion, Discussion
time zones and computing dates, Problem-Discussion
time-zone classes, Introduction
timeouts, threading, Problem-Discussion
Timer service, Solution-Discussion

times (see dates and times)
TimeUnit class, Discussion
timing program, reflection, Problem-See Also
TLS (Transport Layer Security), Problem-See Also
toArray() method, Discussion
toBinaryString() method, Discussion
toCharArray() method, Solution
today's date or time, Problem-Discussion
toHexString() method, Discussion
toInstant().getEpochSecond() method, Discussion
toJson() method, Discussion
tokenizing, Solution-Tokenizing
tolerance, floating-point number equality, Comparing floating-point values
toLowerCase() method, Discussion
Tomcat, Discussion
toOctalString() method, Discussion
toString() method
- Arrays, Discussion
- Class, Discussion
- converting integers to alternative number base, Discussion
- converting numbers to strings, Introduction
- JSON with ChatGPT, Discussion
- JSONArray/JSONObject, Discussion
- object formatting, Problem-toString()
- period between dates, Discussion
- platform-independent code, Discussion
- with StringBuilder, Introduction, Discussion
toUpperCase() method, Discussion
TR type parameter, Discussion
training, in machine learning, Introduction
transform() method (String), Introduction
transient/temporary files, Problem-Discussion
transitive dependencies, Discussion
Transport Layer Security (TLS), Problem-See Also
TreeMap, Discussion-Discussion
TreeSet, Discussion, Discussion-Discussion
Tribuo, Oracle Tribuo
triple slash (///), Markdown, Markdown 23
Trivial File Transfer Protocol (TFTP), Introduction
try-with-resources, socket connection, Discussion

try/catch block, Standard input and output streams
tryLock() method, Discussion
type parameter, Solution
type parameter, and Collections, Discussion
type pattern matching, Problem-See Also
typesafe, making enumerations, Discussion-Discussion

U

UDP (user datagram protocol), Problem-Discussion
Unicode characters, Discussion
- converting to/from Strings, Problem-Discussion
- encoding a text file, Problem
- Java regex package, Discussion
- operating systems' handling of, Discussion
UNICODE_CASE flag, Discussion, Discussion
unindenting strings, Discussion
unit testing, Discussion, Problem-See Also, Solution-Discussion
Unix file permissions (see PosixFilePermission)
Unix Network Programming (Stevens), See Also
Unix pipelines, and Streams, Introduction
Unix Power Tools (Peek, Powers, O'Reilly, and Loukides), See Also
UNIX_LINES flag (regex), Discussion, Discussion
UnknownHostException, Discussion
unlock() method, Discussion
Unsafe class, Probably?
up call, Discussion
uptime command, Probably?
URI, URL, and URN, Problem-Discussion
URL object (ClassLoader), Discussion
URL, reading from web client, Problem-See Also
URLConnection class, Solution, Discussion
user datagram protocol (UDP), Problem-Discussion
UserMessage, Solution
UTF-16, Discussion
utility classes, downloading, Problem-Caveat lector

V

var keyword, variable definition, Discussion

Vector arithmetic package, Problem-Discussion
Vector class, Discussion, Discussion, Discussion, Discussion
Vector.add(), Discussion
Vector.get(), Discussion
version and name, assigning, See Also
version control systems, Caveat lector, Discussion
versions
- compatibility with book information, Preface
- dependency management with Maven, Maven
- JUnit series, See Also
- writing code that depends on Java version, Dealing with code that depends on the Java version or the operating system
virtual threads, Introduction, Solution-Discussion, Discussion
VisualVM tool, Profilers
Vlissades, John, Discussion, Introduction
volatile modifier, variables in JNI, Discussion
VSCode IDE, Discussion, Discussion

W

Wadler, Philip, See Also
wait() method, Discussion
waitFor() method, Discussion
walk() method, Discussion-Discussion
walkFileTree() methods, Discussion-Discussion
walking a file tree, Problem-Discussion
WAR (web archive) file, Problem
Warburton, Richard, See Also
warn() method, Discussion
WatchService class, Discussion
web application, Discussion
web page display of data, R, Problem-Discussion
web server, Discussion
web services, Introduction
web tier resources, packaging into single file, Problem
when function (Mockito), Discussion
while loop, while loop
who program (Unix), Discussion
WildFly (EE application server), Discussion, Discussion
windowFixed() method, Discussion

windowSliding() method, Discussion
with() method, Discussion
withLocale() method, Localized DateTimeFormatter instances
word frequency count algorithm, Discussion
words in a string, reversing, Discussion
WordUtils class, Discussion
work-stealing, Discussion
wrapper types, Introduction
writeLock() method, Discussion
Writer class, Introduction, Solution-Discussion, Discussion
writing files (see input/output)

X

Xcode, Discussion
XDoclet, Discussion
XMPP, See Also
XP (Extreme Programming), Caveat lector, Discussion
XPath, Discussion

Y

yacc parser generator, Discussion

Z

Zeal (Mac documentation viewer), Javadoc and Dash/Zeal
Zip archives, Problem-See Also
ZIP files, Problem-See Also
ZipEntry class, Solution-See Also
ZipFile class, Solution-See Also
ZipFile.getInputStream() method, Discussion
ZipFile.getName() method, Discussion
ZipFile.stream() method, Discussion
ZipOutputStream class, Discussion
ZonedDateTime class, Solution-Discussion, Discussion
