Part II: Tables

1.1 Terminology for Class Members
1.2 Format Specifier Examples
2.1 Keywords in Java
2.2 Contextual Keywords
2.5 Separators in Java
2.6 Examples of Literals
2.3 Reserved Keywords Not Currently in Use
2.4 Reserved Literals in Java
2.7 Examples of Decimal, Binary, Octal, and Hexadecimal Literals
2.8 Representing Signed `byte` Values Using Two's Complement
2.9 Examples of Character Literals
2.10 Escape Sequences
2.11 Examples of Escape Sequence `\ddd`
2.13 Range of Character Values
2.14 Range of Floating-Point Values
2.12 Range of Integer Values
2.15 Boolean Values
2.16 Summary of Primitive Data Types
2.17 Selected Conversion Contexts and Conversion Categories
2.18 Operator Summary
2.19 Examples of Truncated Values
2.20 Arithmetic Operators
2.21 Examples of Arithmetic Expression Evaluation
2.22 Arithmetic Compound Assignment Operators
2.23 Relational Operators
2.24 Primitive Data Value Equality Operators
2.25 Reference Equality Operators
2.26 Truth Values for Boolean Logical Operators
2.27 Boolean Logical Compound Assignment Operators
2.28 Conditional Operators
2.29 Truth Values for Conditional Operators
2.30 Integer Bitwise Operators
2.31 Result Table for Bitwise Operators

2.32 Examples of Bitwise Operations
2.33 Bitwise Compound Assignment Operators
2.34 Shift Operators
2.35 Shift Compound Assignment Operators
3.1 Default Values
3.2 Parameter Passing by Value
4.1 Comparing the `switch` Statement and the `switch` Expression
4.2 The `return` Statement
5.1 Overriding, Hiding, and Overloading of Methods
5.2 Summary of Member Declarations in an Interface (Part I)
5.3 Summary of Member Declarations in an Interface (Part II)
5.4 Types and Values
6.1 Compiling and Executing Non-Modular Java Code
6.2 Access Modifiers for Top-Level Reference Types (Non-Modular)
6.3 Accessibility of Members in a Class (Non-Modular)
6.4 Accessing Members within a Class
6.5 Examples of Immutable Classes
7.1 Comparing Checked and Unchecked Exceptions
8.1 Indenting Lines in a String
8.2 Incidental Whitespace in Text Blocks
8.3 Applying Rounding Functions
8.4 Big Number Classes
9.1 Various Aspects of Type Declarations
11.1 Summary of Subtyping Relationships for Generic Types
11.2 Get and Set Operations Using Parameterized References
11.3 Summary of Get and Set Operations Using Parameterized References
11.4 Examples of Type Erasure
11.5 Examples of Reifiable Types
11.6 Examples of Non-Reifiable Types
12.1 Summary of Arrays versus `ArrayList`s
13.1 Basic Functional Interfaces in the `java.util.function` Package
13.2 Built-In Functional Interfaces in the `java.util.function` Package
13.3 Summary of Built-In Functional Interfaces
13.4 Suppliers
13.5 Predicates
13.6 Consumers
13.7 Functions
13.8 Two-arity Functions
13.9 Unary Operators
13.10 Binary Operators

13.11 Method and Constructor References
15.1 Core Interfaces and Concrete Classes in the Collections Framework
15.2 Summary of Collection and Map Implementations
15.3 Bulk Operations and Set Logic
15.4 Summary of Methods in the Queue Interface
15.5 Summary of Deque Methods
15.6 Summary of Scenarios Using Advanced Key-Based Operations
15.7 Map Implementations
16.1 Summary of Stream Building Methods
16.2 Interoperability between Stream Types
16.3 Selected Aspects of Intermediate Stream Operations
16.4 Intermediate Stream Operations
16.5 Terminal Stream Operations
16.6 Additional Terminal Operations in the Numeric Stream Interfaces
16.7 Static Methods in the `Collectors` Class
16.8 Method Comparison: The Stream Interfaces and the `Collectors` Class
17.1 Fields in Selected Classes in the Date and Time API
17.2 Selected Method Name Prefixes in the Temporal Classes
17.3 Selected Common Methods in the Temporal Classes
17.4 Some Differences between the `Period` Class and the `Duration` Class
18.1 Selected Language Codes
18.2 Selected Country/Region Codes
18.3 Selected Predefined Locales for Languages
18.4 Selected Predefined Locales for Countries
18.5 Result and Parent Bundles (See Example 18.3)
18.6 Compact Number Styles
18.7 Formatting Numbers to Compact Form
18.8 Parsing Compact Form to Numbers
18.9 Selected Rounding Modes
18.10 Selected Number Format Pattern Symbols for the United States
18.11 Selected ISO-Based Predefined Formatters for Date and Time
18.13 Using Style-Based Formatters
18.12 Format Styles for Date and Time
18.14 Using Style-Based Parsers
18.15 Selected Date/Time Pattern Letters
18.16 Format Type and Format Style Combinations for Format Elements
19.1 Module Accessibility Rules
19.2 Overview of Module Directives
19.3 The `open` Modifier for Modules
19.4 How JARs Are Handled Depends on the Path

19.5 Module Comparison
19.6 Selected Operations with the JDK Tools
19.7 Selected Options for the javac Tool
19.8 Selected Options for the java Tool
19.9 Selected Options for the jar Tool
19.10 Selected Options for the jdeps Tool
19.12 Selected Common Shorthand Options for JDK Tools
19.11 Selected Options for the jlink Tool
20.1 Selected Input Streams
20.2 Selected Output Streams
20.3 The DataInput and DataOutput Interfaces
20.4 Selected Readers
20.5 Selected Writers
20.6 Print Methods of the PrintWriter Class
20.7 Correspondence between Selected Byte and Character Streams
21.1 Using Current and Parent Directory Designators
21.2 Converting to an Absolute Path
21.3 Normalizing Paths
21.4 Resolving Paths
21.5 Constructing a Relative Path between Two Paths
21.7 Converting to a Real Path
21.6 Link Option
21.8 Standard Copy Options
21.9 Selected Standard Open Options
21.10 POSIX File Permissions
21.11 Interfaces for Read-Only Access to File Attributes
21.12 Selected File Attribute Views
21.13 File Visit Option
22.1 Thread States Defined by the Thread.State Enum Type
22.2 Selective Priorities Defined by the Thread Class
23.1 Constants Defined by the java.util.concurrent.TimeUnit Enum Type
23.2 Selected Executor Services Provided by the Executors Utility Class
23.3 Task-Defining Classes
23.4 Selected Atomic Classes
23.5 Concurrent Collections in the java.util.concurrent Package
23.6 Characteristics of Concurrent Collections
23.7 Selected Methods in the ConcurrentLinkedQueue Class
23.8 Selected Methods in the ConcurrentLinkedDeque Class
23.9 Concurrent Maps in the java.util.concurrent Package
23.10 Characteristics of Concurrent Maps

23.11 Blocking Queues in the java.util.concurrent Package
23.13 Selected Methods in the BlockingQueue Interface
23.12 Characteristics of Blocking Queues
23.14 Selected Methods in the BlockingDeque Interface
23.15 Copy-on-Write Collections in the java.util.concurrent Package
23.16 Characteristics of Copy-on-Write Collections
24.1 Definition of the compositions Table
24.2 Data in the compositions Table
24.3 Selected Constants Defined in the ResultSet Interface
25.1 Retention Policy Values for the @Retention Meta-Annotation
25.2 The ElementType Values for the @Target Meta-Annotation
25.3 Summary of Selected Standard Annotations
