Summarize

Appendix B. Architecture Decision Record References

Each Sysops Squad decision in this book was accompanied by a corresponding Architecture Decision Record. We consolidated all the ADRs here for easy reference:

"ADR: A short noun phrase containing the architecture decision"

"ADR: Migrate Sysops Squad Application to a Distributed Architecture"

"ADR: Migration Using the Component-Based Decomposition Approach"

"ADR: Use of Document Database for Customer Survey"

"ADR: Consolidated Service for Ticket Assignment and Routing"

"ADR: Consolidated Service for Customer-Related Functionality"

"ADR: Using a Sidecar for Operational Coupling"

"ADR: Use of a Shared Library for Common Ticketing Database Logic"

"ADR: Single Table Ownership for Bounded Contexts"

"ADR: Survey Service Owns the Survey Table"

"ADR: Use of In-Memory Replicated Caching for Expert Profile Data"

"ADR: Use Orchestration for Primary Ticket Workflow"

“ADR: Loose Contract for Sysops Squad Expert Mobile Application”
